Subject: FW: Sen. Whitehouse Inquiry on Pesticide Registration Reviews

Rick,

Below is the response to Sen. Whitehouse's inquiry about the reg review schedules for chlorpyrifos, diazinon and malathion (see link referenced). Billy provided input for that response. The second part of the question has to do with the general components of risk assessments for reg review. I took a stab at answering that one. Any thoughts on this?

Reg review schedules:

<https://www.epa.gov/pesticide-reevaluation/registration-review-schedules>

Sen. Whitehouse Inquiry:

I am reaching out with a few questions about pesticide reviews, particularly chlorpyrifos, diazinon, and malathion. Based on EPA's website, the agency is planning to release draft risk assessments for diazinon and malathion in Q2. In addition, the table shows a planned Q2 draft risk assessment and Q4 proposed interim decision for chlorpyrifos. Are all those risk assessments on track/have any of them been released? If so, what's the best place to find information on the status and content of these risk assessments?

In the chlorpyrifos case, you mentioned multiple assessments EPA is still working on – human health and ecological. Are all risk assessments

comprised of these separate components or does this depend on the pesticide and its use? I'm trying to get a better grasp on how this process works!

OPP Response:

Subject: Sen. Whitehouse Inquiry on Pesticide Registration Reviews

Pesticides Team,

Please see the request below from Maggie with Sen. Whitehouse's staff. She's asking about:

- status of chlorpyrifos, diazinon and malathion risk assessments
- general question on registration review components

Please let me know our response and if any questions. Thanks,

Sven

Subject: RE: Sen. Whitehouse Inquiry on Glyphosate

Hi Sven,

I hope you're well! I am reaching out with a few questions about pesticide reviews, particularly chlorpyrifos, diazinon, and malathion. Based on EPA's [website](#), the agency is planning to release draft risk assessments for diazinon and malathion in Q2. In addition, the table shows a planned Q2 draft risk assessment and Q4 proposed interim decision for chlorpyrifos. Are all those risk assessments on track/have any of them been released? If so, what's the best place to find information on the status and content of these risk assessments?

In the chlorpyrifos case, you mentioned multiple assessments EPA is still working on – human health and ecological. Are all risk assessments comprised of these separate components or does this depend on the pesticide and its use? I'm trying to get a better grasp on how this process works!

Thanks in advance for any insight you can offer.

Best,
Maggie
